

AI Scrum Manager : Daily Sprint Report - 18-07-2025

AI-Generated Summary

The team has made notable progress, completing 1 out of 7 stories, with a total of 25 points, and currently has 4 stories in progress. The majority of the stories are moving forward, but 2 stories, including a bug fix for the unresponsive login button on mobile, remain in the "To Do" status, indicating potential blockers or areas for attention. Overall, the team's completion rate and progress suggest a steady workflow, but focusing on tackling the pending "To Do" stories will be essential to maintaining momentum and ensuring timely project delivery.

Summary

Total Stories: 7

Total Story Points: 25

Status Breakdown:

- In Progress: 4
- To Do: 2
- Done: 1

AS M- 6	Feature Request: Add Dark Mode Toggle	In Progr ess	Umakan ta Behera	1	<ul style="list-style-type: none"> Design mockups for the toggle are ready. Will start with implementing the basic CSS variable switching logic. (Prakash M : 2025-07-08T12:20:17.757+0530) Work in progress: Currently implementing the core CSS variable structure for dark mode. I'm setting up the initial color palette and ensuring the basic toggle functionality, including local storage persistence, is working correctly. (Prakash M : 2025-07-18T11:11:53.668+0530) 	The comments on story ASM-6 discuss the progress of implementing a dark mode toggle feature, with design mockups ready and the developer currently working on implementing the core CSS variable structure and toggle functionality with local storage persistence. The feature is still in progress, with no mentioned blockers or decisions, as the developer Prakash M provides updates on the implementation status.
AS M- 5	Bug: Login button unresponsive on mobile	To Do	Vikash Kumar	5	<ul style="list-style-type: none"> Investigating potential CSS z-index issues or event listener conflicts specific to touch events on mobile browsers. Initial check shows no obvious errors in console (Prakash M : 2025-07-08T12:19:28.076+0530) Work in progress: Currently focusing on debugging the touch event listeners on the login button 	Investigation is underway for the unresponsive login button on mobile, with a focus on potential CSS z-index issues, event listener conflicts, and debugging touch events on various mobile browsers, including Android Chrome and iOS Safari. The issue is still being worked on, with the developer currently debugging the touch event listeners to identify

					<p>across different mobile browsers. I'm specifically looking into potential overlaps with other elements or CSS properties that might be preventing the tap event from registering correctly, especially on Android Chrome and iOS Safari.</p> <p>(Prakash M : 2025-07-18T11:29:54.651 +0530)</p>	the cause of the problem.
AS M-4	Implement User Profile Page	Done	Prakash M	3	<ul style="list-style-type: none"> Started working on the front-end layout. Will use React components for modularity. Need to confirm the exact fields required for the profile (Prakash M : 2025-07-08T12:18:41.925 +0530) *Closing this ticket as the User Profile Page implementation is complete.* * Front-end: UI/UX for displaying and editing user information is implemented and responsive. * Back-end: API endpoints for fetching and updating user data are created and integrated. * Database: Schema 	<p>The comments on this Jira story discuss the implementation of the User Profile Page, with the developer starting work on the front-end layout using React components and later confirming the completion of the task, including UI/UX, API endpoints, and database schema updates. The story is now marked as "Done" with the developer closing the ticket after completing all necessary tasks.</p>

						updated as necessary for new profile attributes. (Prakash M : 2025-07-18T10:19:45.857+0530)	
AS M-3	As a user, I want to reset my password so that I can regain access if I forget it.	In Progress	Umakanta Behera	3	2025-07-20	<ul style="list-style-type: none"> Made the API changes and pushed the code. Unit and Integration testing is in progress. (Umakanta Behera : 2025-06-30T14:22:58.011+0530) Backend API changes for password reset functionality are complete and have passed initial unit and integration tests. Next up: developing the front-end components for the password reset request form and the new password submission. (Prakash M : 2025-07-18T10:57:25.563+0530) 	The password reset functionality is in progress, with the backend API changes completed and having passed initial unit and integration tests. Next steps include developing the front-end components for the password reset request form and new password submission, as mentioned by Umakanta Behera and Prakash M in their comments.
AS M-2	As an admin, I want to create new users so that I can onboard team members.	To Do	Umakanta Behera	5		<ul style="list-style-type: none"> Beginning research into existing user management systems and best practices for secure user creation and role management. This will help 	Here is a concise summary of the comments for the Jira story ASM-2: Research has begun into existing user management systems and best practices for secure user creation and

inform the design of the user creation form and backend architecture.
